Israel Security Situation Daily Update

20th November 2025

Dear Partners and Valued Customers,
We would like to provide you with an update regarding the current status of our operations in Israel, following recent regional developments.

Operational Status – Israel

Israel's international airport (TLV) and ocean ports are open and fully operational.

Airports -

In light of the latest developments in the region, several airlines have announced temporary changes to their flight schedules. Below is an update on our current operations in Israel and carrier availability. As the situation is dynamic, we expect daily updates to airline schedules and will make sure to keep you updated with any new changes.

Ocean Ports -

Ocean carriers are operating at normal schedules. In face of **Houthi attacks** in the Red Sea, Eastbound shipping routes have been shifted around Cape of Good Hope. Kindly consult with our ocean import and export teams with respect to new surcharges and or any service changes.
